

Dear Prospective Member,

Thank you for your interest in Mohican Sailing Club on the serene Charles Mill Lake.

We are a diverse, family-oriented group of individuals that share a love of sailing and fun. There is a little something for everyone at the club. For the experienced sailors, we have the weekly Sunday Jet-14, Interlake, and open class races from June to October. For the novice, we hold sailing lessons in June where you can actually learn to sail your own boat. What if you don't own a boat? Not to worry. You can sail one of the Club-owned Sunfish and Optimist Dinghies, or you can hitch a ride with one of the other members. Many of the members are always looking for able-bodied crew, and it is a great way to learn the ins and outs of racing! For the non-sailors, we have the beach to relax at. And after a great afternoon on the water or relaxing, we stoke up the grill and top off each Sunday with a pot-luck dinner on the porch overlooking the lake.

If a quiet summer evening is more to your liking, again the club is the place. During the week, the club is often empty so you can take an evening sail and then return to the clubhouse for a picnic under the stars.

What would be the summer without Memorial Day, 4th of July, and Labor day? At the club, the summer holidays are events in themselves. Of course, the festivities include sailing, but with an unusual twist such as the poker run, or boat swap. There are also lots of activities for the younger crowd including kids sailing races, the famous 4th of July water slide, or just hanging out on the beach.

And just in case you think the fun is over when the weather turns cold.... think again. We are a year-round facility. The house and grounds are available for use by its members throughout the year. We hold socials so everyone can keep in touch. When the snow finally arrives, there is sledding and ice skating on the lake, followed by steaming hot chocolate.

This is a great place to bring family and friends. Guests are always welcome. We really have it all. So give us a try.
