Dear Sir:

On February 15th, I wrote to you about securing a power line to our clubhouse on the southwest shore of Charles Mill Lake, near Mifflin.

Since I have not heard from you, I wondered if my letter was misdirected in some way. We are installing the wiring in the building now and would like to know where to figure on putting the installation for the incoming line. The building will be completed by May 1st and we are anxious to have everything completed at that time for the convenience of our membership.

Please advise us immediately if we are not following the proper procedure in securing R.E.A. service as it is necessary that we proceed at once in securing the necessary power.

Yours very truly,

Mohican Sailing Club
Glenn Macy, Sec'y.
